Vision, Strategy, Transformation

Elaine P. Maimon Foreword by Carol Geary Schneider

"One of America's best university presidents has written a brilliant book that will surely inspire and instruct other educational leaders. Each page overflows with eloquence, wisdom, evidence, and powerful examples. This book is perhaps Maimon's most significant gift to higher education. Anyone interested in transformation must read it." — Shaun R. Harper, Clifford and Betty Allen Professor, University of Southern California Rossier School of Education

"Raising the bar for student success is critical for America as it confronts the challenges of the twenty-first century. This is the right time to address transformational leadership in higher education and the indispensable role of public four-year comprehensive state colleges and universities. This book combines the author's scholarly knowledge and practical experience to provide guidance, encouragement, and inspiration for transformational leadership. It is an indispensable resource for those committed to improving their institutions in the interest of student success."—Muriel A. Howard, Ph.D., President, American Association of State Colleges and Universities (AASCU)

This book takes on the big questions and issues of change and change management, what needs to be done and how to do it. Writing in a highly accessible style, the author recommends changes for higher education such as the reallocation of resources to support full-time faculty members in foundation-level courses, navigable pathways from community college to the university, infusion rather than proliferation of courses, and the role of state universities in countering the disappearance of the middle class. The book describes how these changes can be made, as well as why we must make them if our society is to thrive in the twenty-first century.
