

On Sept. 12<sup>th</sup> Northwell Ventures, in partnership with the Israel Economic Mission and the Israeli Innovation Authority, will host an event at the Metropolitan Club in New York City to promote Israeli healthcare advances and technology. AJAS is proud to be a sponsor of this endeavor.

Participants will have the opportunity to meet with promising young entrepreneurial companies that may have products our industry and AJAS communities can value and support. This is intended to be the precursor to a mission of AJAS members to Israel in spring 2018.

The mission, still in development, will be an opportunity to meet with companies and provide an audience for their products and afford participants with a means of denouncing the disturbing worldwide BDS movement.

We have only 15 tickets to the event. The joint agreement brokered by Northwell Ventures and the Government of Israel Economic Mission promotes collaboration between Israeli and American companies in a variety of sectors specifically embracing health care.

The partnership is designed to create innovation synergies health system and support Israeli companies in medical technologies validation projects, co-fund R&D projects and organize additional joint innovation days.
