

Who We Are

[Dancing Classrooms](#) is a 10-week, 20-session in-school social development residency program for 5th and 8th grade children that utilizes ballroom dancing as a vehicle to change the lives of the children it serves. Dancing Classrooms is not about teaching dance. Dance is a “tool” for getting the children to break down social and cultural barriers while working together to achieve a common goal. The results of this experience are vast, transformational, and support student achievement.

Our Invitation to You

More than 26,000 children, many of whom fall within some of our most underserved communities, have been served by our program. However, there’s still much work to be done as the need has never been greater, and we believe every child should have this [transformational experience](#) as a part of their education.

Our goal is to increase the number of Northeast Ohio students served annually and YOU CAN HELP!
