

Native Area Maintenance Update

November 18, 2020

All mowing for the Level 3 Fall maintenance schedule has been completed, with the exception of the recently turned over neighborhoods 84, 85, and 87. The remaining 3 neighborhoods should be completed shortly after the Thanksgiving holiday. Happy Turkey Day y'all. 😊

Although the majority of this process can be handled by our mowers, there are some areas that are less accommodating and will need to be handled with line trimmers. The Line Trimmers can be up to several weeks behind the mowers. All cuttings will be left where they fall. This is a Fire Wise exercise only, and not for aesthetic, or any other purpose.
