Dear ASLA Oregon Members,

We are researchers at the University of Illinois at Chicago conducting a study titled [Crowd+AI Tools to Map, Analyze, and Visualize Sidewalk Accessibility for Inclusive Cities."] We are reaching out to invite urban planning, engineering/public works, active transportation, and other professionals like you to share your valuable expertise on improving sidewalks.

Our goal is to understand how urban planning professionals prioritize pedestrian barriers for improvement. Your insights as an urban planner are essential to helping us develop tools that are useful, sustainable, and scalable across municipalities.

Participation includes a one-time survey that is approximately 20-30 minutes. You will be asked to rate different images showing barriers in pedestrian infrastructure in terms of their priority for improvement. Participants who complete the survey and are verified to provide genuine responses will be entered into a lottery for a $25 Amazon gift card, and 15 Awardees will be selected.

You may be eligible if you:

- Work in urban planning, transportation, ADA coordination, or public works
- Have knowledge or experience with pedestrian/transportation planning
- Are at least 18 years old
- Speak and Understand English
- Live in the US
- Able to view and interpret images without assistance

If you are interested in participating, please use this link to complete a pre-survey to determine your eligibility.

If you would like more information, please contact us at: kmcke6@uic.edu

Principal Investigators:

Dr. Yochai Eisenberg (UIC), yeisen2@uic.edu

Thank you for considering this opportunity to support accessible and inclusive urban development.

Warm Regards,

KiAnna
