

Preparing for the Day of Pentecost

In this **Season of Creativity**, we wanted to come up with a way to celebrate Pentecost in our homes this year, since we will not be able to create a community art project at church like we often do.

- **Pentecost Streamer:** Enclosed in this envelope are ribbons and a key ring --create streamers to wave during our service.
- **Fire and Wind Lantern:** Cut along the solid line below and color the images with markers, crayons, colored pencils or whatever you have available at home. Cut a slit (solid lines) at the top left and the bottom right, then fold on the creases and tuck the tabs inside. This will create a three-sided lantern which can be used with a battery powered tealight. You can add this to your sacred space at home and place it in your zoom view for services on Sunday, May 31st.
