Implementation Science and Digital Health to Promote Evidence-Based Practice in Radiation Oncology

Erin Gillespie, MD, MPH, is an associate professor of radiation oncology at the University of Washington School of Medicine and the Fred Hutch Cancer Center. Her role is that of a clinician scientist and health services researcher with a focus on implementation science and its application to clinical radiation oncology. Dr. Gillespie specializes in radiation treatment for patients with breast cancer and metastatic disease, and her research interests include how to optimize care to reduce the burden on patients and improve their quality of life. She received her MD from the University of Michigan Medical School and completed residency at the University of California San Diego Medical Center.
