

## **DOMINION ENERGY GAS MAIN PROJECTS**

### **West 220 Street and Brookpark Road:**

Dominion Energy's gas line replacement project on West 220 Street from Lorain Road to Brookpark Road and on Brookpark Road from Mastick Road to the Brookpark bridge has the majority of installation of new lines completed with site restoration work remaining which shall be completed in early fall. Please be aware that this project will require Dominion Energy personnel to enter residences to move the service over to the new line and to inspect pilot lights, etc.

### **Mastick Road:**

Work has begun on Mastick Road from Clague Road to Brookpark Road. The Dominion Energy contractor will be installing a new gas main next to the road. Construction will require a zone where traffic is reduced to one lane with flaggers moving two-way traffic around this zone. The zone will move down Mastick Road toward Clague Road. As flaggers move traffic around the work zone, please expect traffic delays. Dominion contractors will be digging along the side of Mastick Road to place a new distribution line including installing boring pits for new service lines for residences. Thank you in advance for your patience. Dominion has sent a letter and placed an automated call to each resident impacted by this project.

### **Stanford Avenue and Woodstock Avenue:**

Dominion Energy has scheduled a summer gas main replacement project on Stanford Avenue and Woodstock Avenue and a portion of Elmore Road (north from Stanford Avenue towards Linden Road) which will be a service replacement project requiring boring pits located in the sidewalk and tree lawn areas, and replacement of services lines to each residence. Please expect delays as equipment is used in these areas. Dominion Energy will be contacting residents about this project by mail and by automated phone messages. They anticipate starting this project in mid-August.

Please do not hesitate to contact City Hall with questions or concerns during these Dominion Energy projects (440-333-2200).
