

WEST 210 STREET ROAD REPAIR AND PAVING PROJECT

The construction has shifted over to the north lane of travel between Lorain Road and North Park Drive. Road and curb repairs are being completed. Once the road repairs are completed in this section, the one-way zone will be relocated to the North Park Drive to Eaton Road area for Phase 2 repairs (again, with a one-way traffic for only northbound traffic) and then the zone will move and the area from Eaton Road to Mastick Road.

Please watch our website for updates as this zone shifts and moves to accommodate work across the entire road. Once all repairs are completed, a final layer of asphalt will be installed. Until the final layer of asphalt is installed, manhole lids and catch basins will be exposed. Please use caution while traveling on West 210 Street south of Lorain Road this summer. We appreciate the funding from the Northeast Ohio Areawide Coordination Agency (NOACA) and the Cuyahoga County Public Works Department which makes this project possible.

Thank you for using caution while driving in the work zone(s).
