

BROOKWAY PAVING OHIO DEPARTMENT OF TRANSPORTATION (ODOT)

The City of Fairview Park is pleased to announce that ODOT is paving Brookway Drive from West 220 Street to Valley Parkway and portions of Valley Parkway to restore pavement after the erosion mitigation projects for the highway bridges (I-90 and Lorain Road Bridge) that have support structures in the Metroparks. The pavement work begins after Dominion Energy construction on gas main replacement is completed on Brookway Drive. Paving of Brookway Drive is scheduled for mid-August, as weather allows and it is anticipated to require 2 to 3 days to complete. Please anticipate delayson Brookway Drive as this important road work is being completed.
