

WEST 227 STREET BRIDGE PROJECT

The City of Fairview Park is pleased to announce that funding for the West 227 Street Bridge Replacement Project has been awarded by the Ohio Department of Transportation (ODOT) and the Ohio Bridge Partnership Program. This bridge is located between Esther Avenue and Bard Avenue on West 227 Street.

Before construction can begin in 2022, a rigorous environmental and current conditions report must be made to ODOT of the West 227 Street Bridge and surrounding area. This requires investigations to take place on the road, along the creek bed and in the creek in an area 120' along Coe Creek on either side the bridge. Our investigations require field crews to take samples and record measurements and report to the Ohio Department of Transportation. One of the investigations requires a drilling rig to drill through the bridge pavement, to a depth of 40', for samples.

Please expect traffic delays when environmental investigation crews are working in the public right of way. Once these environmental investigations are complete, design of the project will begin with construction anticipated during the summer of 2022.
