

## **BAIN PARK**

The City has begun a review of erosion along Coe Creek within Bain Park (between the Pavilion and Bain Cabin). This review will include areas around the pedestrian bridges and adjacent areas. Once these investigations are concluded, engineers will advise the City regarding measures necessary for erosion mitigation project(s).

The City anticipates working with the Cuyahoga Soil and Water Conservation District for guidance and potential grants for erosion control measures. The City is also pursuing grant funding for erosion control improvements and potential maintenance work at Bain Cabin. The City will update the community as funding becomes available. There is no work schedule established at this time.
