

MORTON PARK COURTS

The courts at Morton Park, which include 5 tennis courts (3 of which will have pickleball accommodations) , 4 pickleball courts and an official size basketball court, have been rebuilt. The Shared Use Agreement with the Fairview Park City Schools requires that tennis courts be provided for the Fairview High School. These courts will be open to the public. The new courts will follow the existing footprint with a slight expansion at the walkway adjacent to the playground to accommodate a full-sized basketball court. New drainage and storm water quality improvements were made as part of this project. Nets should be installed this week, weather permitting. Information about the grand opening will be posted on the City's website as soon as it is available.

BROOKPARK ROAD PAVING PROJECT

The Brookpark Road paving project, funded by the Ohio Department of Transportation (ODOT), is completed. This project also included the redesign of the Mastick Road intersection for pedestrian safety, road repairs, and new pavement.

The pedestrian lighting is being installed and the contractor is completing the final punch list.

WEST 227 STREET BRIDGE REPLACEMENT

Ohio Department of Transportation (ODOT) is funding the replacement of the bridge over Coe Creek on West 227 Street between Esther Avenue and Bard Avenue. The entire cost of the bridge replacement is funded by ODOT. Catts, Inc. has been awarded the project.

During construction for the bridge replacement, West 227 Street is closed between Esther Avenue and Bard Avenue and detour routes are in place. The City and the contractor will work to minimize the duration of the West 227 Street road closure.

BAIN PARK EROSION PROJECT

In Bain Park's woods, along Coe Creek, an erosion control project is being engineered. The design scope has been reviewed by the U.S. Army Corps of Engineers since Coe Creek is a water of the State and conveys storm water to the Rocky River and eventually Lake Erie. The permitting from the Army Corps of Engineers is in process. The City is now waiting for the Ohio EPA's review of the project. The Ohio EPA's suggestions will be incorporated to the design and the public bidding documents that will be created by the consulting engineer. The bidding schedule of this project will be determined after the EPA review is complete.

WOODSTOCK AVENUE SEWER REPLACEMENT PROJECT

The sewer replacement project for Woodstock Avenue has been awarded federal Community Project funding (\$3.5 million) from the United States Congress. The City Engineer's design of the sewer replacement has started. The engineering design is 90% complete. Once completed, the bid specifications will be made by the Engineer and the project will be publicly bid. The City anticipates a bid to be scheduled in summer 2024.

STANFORD AVENUE SEWER AND WATER MAIN REPLACEMENT PROJECT

The City was awarded federal funding (\$5.5 million) for the replacement of sewers and Cleveland Division of Water funding for the water main replacement. Design work by the City's consulting engineer is underway.

FAIRPARK DRIVE WATER MAIN REPLACEMENT

The contractor has completed the water main replacement project and paving. Grass restoration has been completed. A punch list of items will be completed by the contractor. Lawns have been replaced and are being watered by the contractor. Thank you for your patience and cooperation during this important project.

WEST 220 BRIDGE OVER I-480 (OHIO DEPARTMENT OF TRANSPORTATION)

The Ohio Department of Transportation (ODOT) has begun the study phase of the West 220

Bridge over I-480. The engineers have alerted the City that the pedestrian fencing between the roadway and sidewalk is not allowed as standards have changed. Initially, ODOT engineers are considering recommending a wider sidewalk area (8' wide on the east side and 6' wide on the west side). Currently sidewalks on this bridge are 5' wide. The project is in the design phase and construction is currently scheduled for 2027.

LORAIN ROAD BRIDGE OVER METROPARKS

The Ohio Department of Transportation (ODOT) has resumed work on the Lorain Road Bridge. One lane of traffic on the bridge is open for eastbound and westbound traffic. Please be cautious in this area as the flow of traffic changes.
