

LORAIN ROAD BRIDGE PAINTING

Ohio Department of Transportation's Lorain Road Bridge painting project continues through this summer. You may have noticed equipment being placed in one lane of travel near the bridge and on the bridge. Some work will remobilize to the north side of the bridge as work requires. Some equipment must stay on Lorain Road. Two-way traffic will be maintained at all times. Work equipment will be situated in the road while work continues to the portions of the bridge under the road. The duration of the work depends upon the weather but it is anticipated to continue through this summer with a completion date of 2022. The scaffolding for pedestrian access to the bridge will remain in place until no longer necessary.
