

Tip Sheet

Travel & Exposure Screening Updates January 2022

In collaboration with the IPAC Team, Dovetale has updated two of the questions in the **Travel and Exposure Screen** to align with the new Ministry guidelines for COVID-19 Screening.

- The first question to capture vaccination status now reads “**How many doses of vaccine have you had?**”
 - If your patient previously had vaccination status documented in the screen, you will still see the original documentation as Read Only:

ARI / Emerging Diseases Surveillance

1. How many doses of vaccine have you had?

Unknown 0 1 2 3

(Read Only) Patient reports COVID Vaccination - both doses received 14+ days ago?

No taken yesterday

Yes No

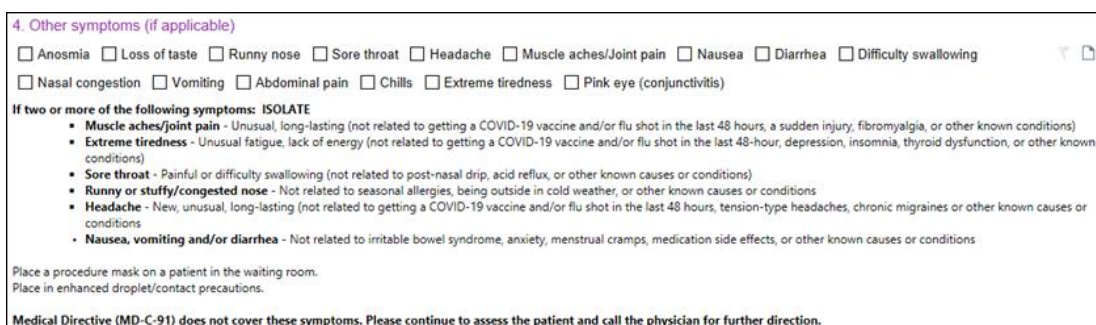

(Read Only) COVID Vaccination No

Unvaccinated taken yesterday

Unknown One dose only Unvaccinated Two doses less than 14 days

- These Read Only rows are un-editable.
- New travel and exposure screens will not include these Read Only rows.

- The fourth question, “**Other Symptoms (if applicable)**”, has minor changes to the available answers, as well as the new guidelines for isolations in the row details.

4. Other symptoms (if applicable)

☐ Anosmia ☐ Loss of taste ☐ Runny nose ☐ Sore throat ☐ Headache ☐ Muscle aches/Joint pain ☐ Nausea ☐ Diarrhea ☐ Difficulty swallowing

☐ Nasal congestion ☐ Vomiting ☐ Abdominal pain ☐ Chills ☐ Extreme tiredness ☐ Pink eye (conjunctivitis)

If two or more of the following symptoms: ISOLATE

- Muscle aches/joint pain** - Unusual, long-lasting (not related to getting a COVID-19 vaccine and/or flu shot in the last 48 hours, a sudden injury, fibromyalgia, or other known conditions)
- Extreme tiredness** - Unusual fatigue, lack of energy (not related to getting a COVID-19 vaccine and/or flu shot in the last 48-hour, depression, insomnia, thyroid dysfunction, or other known conditions)
- Sore throat** - Painful or difficulty swallowing (not related to post-nasal drip, acid reflux, or other known causes or conditions)
- Runny or stuffy/congested nose** - Not related to seasonal allergies, being outside in cold weather, or other known causes or conditions
- Headache** - New, unusual, long-lasting (not related to getting a COVID-19 vaccine and/or flu shot in the last 48 hours, tension-type headaches, chronic migraines or other known causes or conditions)
- Nausea, vomiting and/or diarrhea** - Not related to irritable bowel syndrome, anxiety, menstrual cramps, medication side effects, or other known causes or conditions

Place a procedure mask on a patient in the waiting room.
Place in enhanced droplet/contact precautions.

Medical Directive (MD-C-91) does not cover these symptoms. Please continue to assess the patient and call the physician for further direction.

- Dovetale logic has been updated to show COVID Risk Levels and appropriate reminders to isolate when the new recommendations for symptoms are met.
 - Isolate when **two or more** of the following are present:
 - **Muscle aches/joint pain** - Unusual, long-lasting (not related to getting a COVID-19 vaccine and/or flu shot in the last 48 hours, a sudden injury, fibromyalgia, or other known conditions)
 - **Extreme tiredness** - Unusual fatigue, lack of energy (not related to getting a COVID-19 vaccine and/or flu shot in the last 48-hour, depression, insomnia, thyroid dysfunction, or other known conditions)
 - **Sore throat** - Painful or difficulty swallowing (not related to post-nasal drip, acid reflux, or other known causes or conditions)
 - **Runny or stuffy/congested nose** - Not related to seasonal allergies, being outside in cold weather, or other known causes or conditions
 - **Headache** - New, unusual, long-lasting (not related to getting a COVID-19 vaccine and/or flu shot in the last 48 hours, tension-type headaches, chronic migraines or other known causes or conditions)
 - **Nausea, vomiting and/or diarrhea** - Not related to irritable bowel syndrome, anxiety, menstrual cramps, medication side effects, or other known causes or conditions
