WATCH US TRANSFORM *THIS* HISTORIC BARN...

This is the once-abandoned 1920s NRHP-registered Potter Peckham Barn, a former seed barn located on the 20 acre campus of the Compass School, a K-8 public charter school in Kingston, Rhode Island.

View from Front

The Compass School is an award-winning elementary/middle school with Rhode Island's largest school garden! Our students learn in multi-aged indoor and outdoor classrooms using a project-based curriculum that focuses on environmental sustainability and social responsibility.

INTO *THIS* MIDDLE SCHOOL BUILDING!

We have a small school community of 174 students residing predominantly in Washington County and collaborative programs which reach thousands of children across the state!

View from Back

Sponsorship opportunities are available. Please consider supporting this renovation as we sustainably reshape a historic barn into Rhode Island's premier laboratory of innovation in environmental education for middle school students.

Construction Slated to Begin in Fall 2018
