

# SAFE RETURN TO WORK PROGRAM

Virginia Hospital Center, through our HealthWorks program, has created a return-to-work program for our corporate partners who will need support as isolation restrictions are lifted and we slowly return to normal business operations. These strategies, modeled from the safe protocols implemented at Virginia Hospital Center, can help you and your employees feel safe and confident coming back to work.

Components of the program can include:

- Assisting with development of policies and procedures.
- Assisting with implementation of screening protocol.
- Staffing of on-site temperature checks and/or mask distribution.
