Pre Project Checklist

Customer Resource

1. Define the Scope

- Have you identified whether this is a private development or publicly bid project?
- Do you have preliminary plans or drawings?

2. Budget and Estimates

- Do you have an initial budget prepared?
- Have you requested an estimate for pumps, parts, and installation?

3. Regulatory and Compliance

- Are BABA or other compliance requirements part of the project?
- Have you reviewed permitting needs with your engineer or municipality?

4. Equipment and Solutions

- Have you determined whether E One low pressure sewer systems are needed?
- Do you know what pump types or configurations fit your application?

5. Project Coordination

- Do you have a project lead or contact for scheduling and communication?
- Have you planned for procurement timelines and delivery windows?

6. Documentation and Support

- Will you need submittals, IOM manuals, or warranty documentation prepared?
- Have you confirmed ongoing service support once the project is complete?

This checklist is provided by Iowa, Minnesota, and Wisconsin Pump Works. Proudly part of United Flow Technologies (UFT).
