Basic HVAC Training II

Looking to improve HVAC operation & maintenance skills?

In partnership with the Oklahoma School Advisory Council (OSAC), ICTC is offering a short term 1 day HVAC training designed to help those working to maintain an efficient AC and heating system. This course is designed to train individuals in the basic maintenance skills necessary to keep AC and heating units working at their peak performance and will allow them to troubleshoot minor problems before they become major problems. *Safety while working around HVAC units will be emphasized throughout the training!*

Course objectives include:

- Check all wiring and connections to controls and electrical connections.
- Check voltage & amperage draw on all motors with meter.
- Check compressor contactor.
- Visually inspect compressor and amperage draw.
- Check start capacitor and potential relay.

Course objectives include items that keeps an air conditioner up and running properly in warmer weather. So don't wait, call to enroll, learn valuable maintenance tips that will help keep you cool in the summer and warm in the winter.

July 28 | 8:30AM - 3:30PM
\$100 per Student, lunch provided
2403 N. 41st St. E., Muskogee, BLD C
