

# National Science Foundation STEM Scholarship Program at Chaminade

## Program Overview

This **prestigious national scholarship program** is funded by a National Science Foundation award to Chaminade University, recognizing our exceptional ability to prepare the next generation of scientists and leaders for Hawai'i and the Pacific region. **We seek students who:**

- are passionate about science, technology and seeking solutions to humanity's biggest challenges, and have the talent to succeed.
- are planning careers in science and technology, from lab research to policymaking, from the environment to cyberspace.
- wish to explore a science education enriched by Hawaiian and Pacific culture and knowledge.

## Benefits

- \$10,000 per year tuition assistance plus additional individual university financial aid awards
- Academic support services to promote on-time graduation (including professional tutoring and specially trained Academic Navigator faculty advisors)
- Chaminade's four-year graduation guarantee
- Access to post-graduate degrees via Chaminade's suite of articulation agreements with medical and graduate schools
- Paid internships for professional development
- Financial support for career development activities such as GRE preparation
- Excellent curriculum that provides a STEM education, contextualized around Hawaiian heritage and a sense of place and values

## Eligible majors:

**BS in Environmental Studies**  
**BS in Data Science, Analytics and Visualization**  
**BS in Biochemistry**  
**BS in Biology**

# Ho`oulu

## STEM Scholarship Program at Chaminade

### Program Overview

This Scholarship Program is funded by Kamehameha Schools and Chaminade University. The vision of this program is to train, *Ho`oulu*, a new generation of Hawaiian scientists, health practitioners, forensic specialists, environmental professionals and business leaders who are equally grounded in science and culture. We seek **promising students who are ready to lead** the charge for a healthy, prosperous, just, and sustainable lāhui of the future.
