To Whom It May Concern:

Children's Hope Alliance is aware that North Carolina is strongly urging residents and visitors to take precautions relating to the coronavirus (COVID-19), including avoiding non-essential travel. We have asked all employees of CHA to adhere to the above non-essential travel directive.

The population that we serve has complex medical and mental health needs that require in-person support from staff. All staff will follow CDC recommendations and exposure precautions but must be able to travel to client homes for needed support.

We have required staff members driving at this time to carry their agency identification and this letter for verification of authorization and need to travel.

For additional information and verification you may contact our Properties Director at (828)260-2633.
