

CICO-SWIS

Tier 2 teams use CICO-SWIS to monitor student progress in the Check-in Check-out intervention. They also keep an eye on how effective the intervention is for those enrolled.

- ▶ Set up the data entry screen to match your school's point card
- ▶ Mark when a student's plan changes, or when students are absent
- ▶ Add individual student goal lines to graphs and celebrate their progress in real-time
- ▶ Add CICO-SWIS to your SWIS subscription and display ODR data on student reports

CICO-SWIS Student Progress

I-SWIS

With I-SWIS, you set up custom data entry fields to collect behavior or academic data collected as part of a student's individualized plan. You choose what you want to collect and how you want to report it. Keep team members informed about student progress and upload the most recent assessments throughout the year. With I-SWIS, student files are as unique as the support you provide.

Administrators Love the SWIS Suite Too!

The SWIS Suite works alongside administrators as they address staff concerns, build relationships with families, and make important decisions affecting all students. With the SWIS Suite, administrators:

- ▶ Generate school-wide reports in a single click to share in breakrooms, newsletters, and staff meetings
- ▶ Follow student progress at every tier within the suite
- ▶ Create durable solutions driven by data they can monitor over time

Subscribe Today

Schools subscribing to SWIS pay a yearly subscription fee based on the number of applications they use. *The cost is the same no matter the size of your school.* We have bulk discounts available for bringing on a large district, region, or whole state!

One App: \$350 annually
Two Apps: \$460 annually
All Three: \$570 annually

Be sure to check out PBIS Assessment – our free, online application for entering surveys like the TFI and the School Climate Survey. Did we mention it's free?

For more information about the SWIS Suite, visit www.pbisapps.org, email us at support@pbisapps.org, or call us at 855-455-8194.

Powerful tools to build positive schools

The School-Wide Information System Suite

The SWIS Suite is an online space to help you make decisions about student behaviors happening in your school every day. Three applications make up the suite—each aligns with the level of student support you provide.

- ▶ **SWIS** – Use office discipline referral (ODR) data to know what's happening school-wide
- ▶ **CICO-SWIS** – Collect Check-In Check-Out data for students enrolled in the Tier 2 intervention
- ▶ **I-SWIS** – Customize data entry screens to monitor individual student support plans at Tier 3

SWIS

Schools use SWIS to enter major ODRs and minor classroom-managed behavior data. School-wide teams use these data to identify problems and make active, real-time decisions – creating the kind of schools where every student is successful.

Collect Meaningful Data

- ▶ Standardized, research-backed drop-down menus keep data accurate and organized
- ▶ Data entry screens ask you to consider a student's motivation behind their behavior
- ▶ Custom fields capture data unique to your school

Eliminate the Paper Shuffle with In-App Referral Workflows

Workflows let teachers enter referrals directly into SWIS and assign them to an administrator for review. Administrators get email and in-app notifications when a referral needs an action. Tailor your workflow settings to match your school's existing process.

Save Time with Powerhouse Reports

16 school-wide reports come standard with every account. With one click:

- ▶ View referral patterns
- ▶ Compare school-wide trends with national averages
- ▶ Start your journey toward defining problems with precision

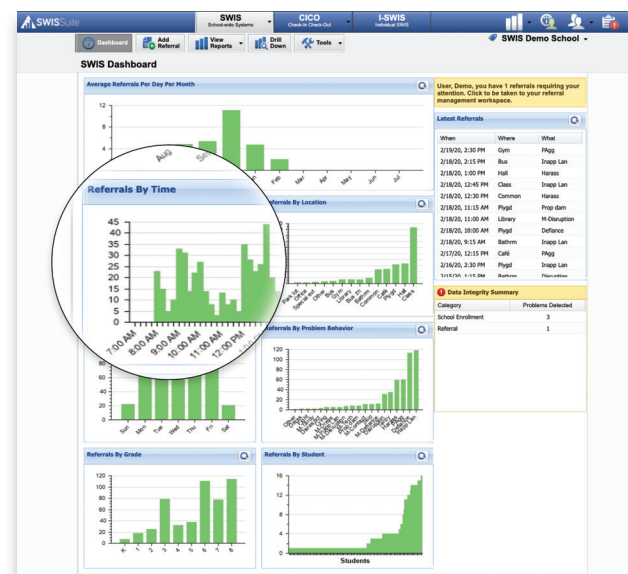

You Already Collect ODRs in Your SIS. Why use SWIS to do the Same Thing?

It's true: You enter data in your Student Information System (SIS). You don't need just a new way to enter data. You need something to help you make good decisions that work for your school. **You already have a SIS; what SWIS does is different.**

Where traditional student information systems store ODR data for end-of-year-reporting, SWIS transforms your ODR data for real-time decision making in ways your SIS can't:

- ▶ Take a quick pulse of what's happening in your building from the second you log in
- ▶ Address equity in your discipline systems with our one-click Ethnicity Reports
- ▶ Narrow a problem to its root using filters in the Drill Down Tool

Integration? SWIS does that too. Our integration options eliminate the pain of double-entering the same information.
