

# Keeping Our School Community Safe

## Updated Covid-19 Cleaning Protocols

West Valley Christian School continues to stay up to date on all of the latest state and local health guidelines. We are confident that the rigorous planning and implementing of current safety procedures will keep our school community safe. On top of encouraging all of our students to wear masks, wash their hands, and social distance, WVCS has also implemented a very comprehensive cleaning program. Classrooms, offices, restrooms, and high touch areas are sanitized and disinfected by the nightly cleaning crew using our state of the art Clorox 360 Electrostatic Sprayer. Several times throughout the school day, the cleaning crew also cleans the restrooms, outdoor tables, playground equipment, and high touch areas, using a cleaning product called Deacon 30. This is a Botanical Disinfectant proven to kill Covid-19. Our teachers are also using Deacon 30 to clean desks, chairs, and frequently touched areas inside the classrooms throughout the school day. Deacon 30 is a fast acting product that is not harmful to our students, faculty, or staff. It is classified under the Environmental Protection Agency's lowest toxicity rating allowed by all for all routes of exposure, including inhalation, ingestion, skin irritation, skin sensitization, and eye irritation. We hope our families can appreciate all of the meticulous efforts being made on campus to ensure the safety of our precious school.
