

C2 Chassis Harness Protective Covering

Available Popular Options

In 2014, our feature **Nylon Yarn Protective Covering** was released for the Saf-T-Liner C2 main chassis electrical harness as an optional upgrade for corrosion protection. This protective covering is made of braided nylon that effectively protects the chassis harness while still allowing water to dissipate. For more information regarding this feature or other corrosion prevention sales options, please see our popular options brochure available through the online TBB Learning Center, check RACE or reach out to the TBB product planning team.

Features and Benefits

- Effective protective covering for main chassis wiring harness
- Braided design allows for water dissipation
