

# Popular Options - Fleetshield Tuffcoat Fuel Tanks

Available Popular  
Options

In 2017 we announced the addition of Fleetshield Tuffcoat to our diesel fuel tanks for the Saf-T-Liner C2. We extended this helpful feature to our Saf-T-Liner EFX and Saf-T-Liner HDX products in the spring of 2019. Using the same corrosion protection on our steel fuel tanks that is available on our stepwells and front bumpers helps guard against the harmful abrasions, debris impacts and harsh deicing chemicals that are used on the roads today. For more information regarding these or other corrosion prevention options, please see our popular options brochure available through the online TBB Learning Center, RACE or reach out to the TBB product planning team.

Features and  
Benefits

- Fuel tank is fully encapsulated with our Tuffcoat corrosion protection coating
- Resistant to chemicals including deicing treatments for roadways
- Guards against harmful abrasions, debris impacts and harsh deicing chemicals
- Flexible textured finish
