As Chief Executive Officer of Metropolitan Contracting Company, Jane brings over 25 years of construction experience. She is responsible for strategic planning, employee and leadership development, operations, and profitability. She oversees all hiring decisions, project selection and ensures that client expectations are being satisfied and all projects are completed safely and in a timely manner.

Jane guides her team of project managers to strive to help clients understand each phase of the development and construction process. In this role, she serves as a communicator and educator whose honesty and integrity results in long-term relationships with repeat clients. The open dialogue also helps ensure that clients feel they are being treated fairly and respectfully, which is one of Jane's primary professional goals.

Metropolitan Contracting is a 34 year old commercial general contractor, specializing in private sector work. About half of their work is interior finish-outs and remodels and the balance is new, ground-up construction. All of their work is sourced through either referrals or repeat clients so they are vigilant about maintaining their reputation for excellence. As CEO, Jane's goal is to provide a workplace that attracts the best in the industry so that Metro can provide the highest quality product and service to their clients.

Jane is a member of the Real Estate Council of San Antonio, Associated Builders and Contractors, serves on the Finance Committee of the San Antonio Economic Development Foundation, as well as on the Programs Committee for CREW. Jane states "I have met some wonderful people through CREW and I love that the objective is to encourage and help women to succeed in the industry." Her favorite quote is "if you treat people fairly, you can't go wrong." In her spare time, she enjoys relaxing and spending time with family and friends.

***Thank you Metropolitan Contracting for being a Sponsor of CREW San Antonio!***
