Information

All animals that are available for adoption at the FLAS are up to date on [vaccinations](#) and [dewormed](#). All dogs have been [heartworm](#) tested and all cats have been tested for [feline leukemia](#) and [FIV](#). Most FLAS adoptable animals will be [altered](#) prior to going home with their new family, but in the case they are not and may be too young you will receive a voucher for the surgery. All FLAS pet adoption fees are [\\$85.00](#), but keep an eye out for special events and rates.

Did you know that [mosquitos](#) can carry and spread [heartworms](#) to your dog? If untreated, their numbers can increase, and dogs have been known to harbor several hundred worms in their bodies. Heartworm disease causes lasting damage to the heart, lungs and arteries, and can affect the dog's health and quality of life long after the parasites are gone. For this reason,

[PREVENTION](#) is by far the best option, and treatment—when needed—should be administered as early in the course of the disease as possible.
