

Take me out to the Book Fair

eWallet

WHY would you want to set up an eWallet?

- IF you don't have cash to send in with your child or forget to send a check, set up an eWallet from your phone or any device with Internet access.
- IF you want to give your teachers a book or purchase a book for the classroom libraries, eWallet is the way to go. (All teachers will create a Wish List at their preview.)
- IT helps eliminate students losing money, checks, credit cards, or change!

WHO can set up an eWallet? Parents, grandparents, other family members, companies...anyone!

WHO can an eWallet be set up for? Students **AND** teachers! Let's fill those classroom libraries!

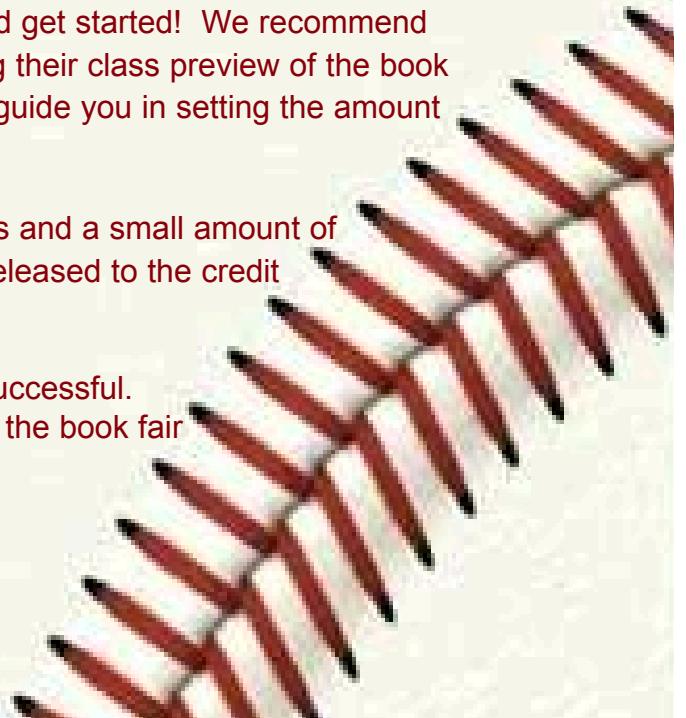

HOW many eWallets can one person have? As many as they want!

HOW does my child use his eWallet? They can bring in the printout from the eWallet setup OR the book fair will have current eWallet data per student/teacher at the register for look-up at time of purchases. If there isn't enough in the eWallet, they can supplement with cash or come back after more money is added to the eWallet.

WHEN can I set up my child's eWallet? eWallets can be set up anytime starting 9/8. Just visit our school's Scholastic homepage (www.scholastic.com/bf/stisidoreelemsch) and get started! We recommend looking at your child's Wish List created during their class preview of the book fair to help in the selection of books. This will guide you in setting the amount for their eWallet.

WHAT happens if my child finishes his purchases and a small amount of money is left in the eWallet? Unused funds are released to the credit card on file once the fair ends.

eWallet was first launched last year and was very successful. However, there is **NOTHING** better than coming into the book fair and looking at all the great books with your children.
