

## See a Fuller Patient Picture with ePDMP Integration through WISHIN Pulse

WISHIN has completed its integration with the state's Enhanced Prescription Drug Monitoring Program (ePDMP). The service is now live for all WISHIN Pulse clients who have elected the PDMP- integration option. The integration means that a patient's prescription history for controlled substances can be accessed from within the WISHIN Pulse system, without separately logging on to the ePDMP or searching for the patient.

In 2014, WISHIN was the first health information exchange (HIE) in the nation to connect to a state Prescription Drug Monitoring Program. To continue delivering this easy access to its participants, on December 7, 2017, the WISHIN Pulse Community Health Record fully integrated with Wisconsin's updated PDMP—the Enhanced Prescription Drug Monitoring Program (ePDMP). Easy access to the ePDMP is essential now that Wisconsin law requires prescribers to consult the ePDMP before writing prescriptions for any of the medications listed in the state's database. Access through WISHIN Pulse allows prescribers to make their decision in the context of the patient's clinical history. More information is available [here](#).

Accessing the ePDMP through WISHIN offers unique value and is almost certainly less expensive than direct integration between an EHR and the ePDMP system.

WISHIN Pulse: THE ONLY COMPREHENSIVE RESOURCE			
	ePDMP	WIN INTEGRATION w/ ePDMP	WISHIN
WHAT IT IS	Stand-alone web portal	Single sign-on w/ local EHR	Statewide HIE
WHAT IT PROVIDES	Prescription history for controlled substances	Integration of ePDMP with local EHR	ePDMP data within the context of other clinical data sources available in the community health record
HOW IT WORKS	Requires a separate sign-on from EHR	Single sign-on to ePDMP	Single sign-on to ePDMP and statewide HIE through local EHR
PRICING	Free	Tiered monthly pricing based on query volume	Annual flat fee for PDMP access
REAL-TIME ACCESS	✓	✓	✓
AUTHORIZED BY DSPS	✓	✓	✓
PRINTABLE & EXPORTABLE	✓	✓	✓
ACCESS TO THE COMMUNITY HEALTH RECORD	NO	NO	YES
