

BRAINSTORMING : Should online learning replace traditional classroom learning?

Online learning

Technology easy way to do things

Access to resources

Making learning convenient and consequences good,bad.

Saves time and comfortable and relax at home, gas saving

Learning online has benefited me a lot. I learned how to use a computer.

Now I know how to interact with technology better than before.

The negative effects of learning online.

What makes me uncomfortable is eating and drinking on the zoom while the camera is on.

Not confident online and no personal contact with teachers, making it online seems unreal.

Learning online was harder. For the first time, it seemed like I was watching a movie.

Also making my mind think differently and nervous seeing myself reflecting.

Traditional LEARNING.

More comfortable contact with the teacher is easier.

Traditional learning provides fostering focus.

Accountability and interaction and frequently asking questions.

Another good way of traditional learning is for students to think of more ideas.

BAD THINGS OF Traditional LEARNING.

Driving to school costs gas and time is a waste

When you study in person and you do not know what to do,people are watching you, it makes you feel more nervous.

Essay Outline:

Draft Correction

Online learning should not replace traditional learning because both are useful in educational settings. Both modes have their advantages and disadvantages. Both are required in different learning situations to accommodate different learning habits.

Online learning is positive, for example it has benefited me a lot in many different ways. It saves gas and time. I am also relaxing at home during the zoom class. The second reason is that I learn how to use computers better than before and now I know how to interact with technology. The good thing about online classes is that people can study anywhere as long as they have a computer and internet.

Traditional learning also has advantages. It is more comfortable and contacting the teacher is easier. It provides fostering focus and helps students to think of more ideas. Traditional learning gives students opportunities to meet new friends and improves their mental health.

However, they both modes have disadvantages. The negative aspect effects of learning online is are that I don't like eating and drinking on the zoom during class. It makes me feel uncomfortable. When I first started the online classes classess it was harder not to have personal contact with the to contact the teacher and I felt nervous. I also don't like seeing myself reflected.

Traditional learning has disadvantages. First of all, driving to school costs gas and time. It is a waste and some students do not drive. The lack of flexibility is a problem, because some students live far away from school.

Online and traditional learning are both good in many different ways. Online studying saves gas and time. It is also flexible. Students who don't know how to use computers learn to interact with technology. Traditional study gives students opportunities to meet new friends and provides better focus and students think of more ideas. These are the good reasons I like both online and traditional learning.
