

Nimia

My name is Nimia Janeth, I'm going to talk about the legislative branch of government.

The legislative branch makes laws in the congress.

The congress has two parts : the Senate and the House Representative with 100 senators, two for state.

There are 435 members in the house of representatives, who are elected for two years.

The leader of the house representatives is called the speaker, Mike Johnson is the speaker now.

The congress in the United States is the only part of the Government that can make new laws and change existing laws.
