

# Are you the parent of a child dependent on medical technology at home?

Photo: Matt Radick

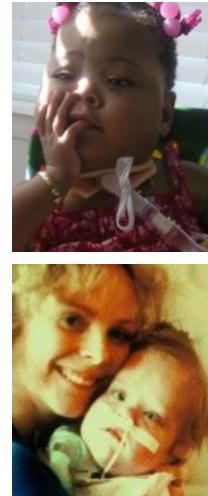

Photo: Dan Perez

Volunteer parents of children aged 6 months-17 years are needed for:

**Resourcefulness Intervention to Promote Self-Management in Parents of Technology-Dependent Children**  
A Research Study funded by NIH/NINR  
Grant # R01NR017614

CWRU Principal Investigator  
Valerie Boebel Toly, PhD, RN, CPNP

Caring for a technology-dependent child at home can be stressful.

Scientists at Case Western Reserve University are seeking ways to help parents cope with the challenges they face when caring for this special group of children.

You may be eligible to take part in this important work.
