The remaining 50 percent of the non-refundable fee is due no later than 35 days prior to the show. There are no cancellations. Booths are sold first come first served.

In-Line Exhibits

Attention should be paid to neighboring exhibitors when constructing exhibits. Side walls may carry the eight foot height only seven feet from the back of the booth. Booths with a visible unfinished back of the exhibit must be either finished or covered with drapery material which can be ordered at the exhibitor's expense from the rental company. Exhibitors are not to display promotional materials on the back of booth sidewalls. Displays should be four inches narrower than the designated space to assure proper fit.

Signs

All signs must be professionally designed and displayed. A standard identification sign featuring the company name and booth number will be furnished by the HBA. Anyone wishing to have signs hung from the ceiling must get the permission of the HBA prior to installing the signs. The HBA will not be responsible for hanging your sign and will not pay for the equipment needed to hang the sign.

Booth Space Assignment

The HBA reserves all rights to assign booth locations but will attempt to separate exhibitors from their direct competition. A copy of the floor plan will be available from the HBA.

Assignment of Space

Installing and Removing Exhibits

Exhibits must be completely assembled and ready for viewing by the general public by the times designated by the HBA. Exhibits must be removed when instructed by the HBA, and may not be removed any time after installation until final closing of the show. Your booth must be set-up on time. The HBA reserves the right to replace or take down a booth that is not set-up on time. Exhibitors will not be allowed to set-up if all fees are not paid in full. Removing your exhibit prior to the end of the show will result in your company not being eligible for an exhibit the following year.

Display Vehicle Regulations & Permit Application

At no time, without approval from the hotel Event Manager, are vehicles allowed to pull in and on the exhibit hall floor. With the exception of display vehicles that have acquired the proper permit.

Definition: Motorized vehicles shall be defined as any vehicle which is propelled by an internal combustion engine and using Class-1 or Class-2 fuel, such as but not limited to automobiles, trucks, motorcycles, aircrafts and water crafts.

All motor vehicles must receive a permit from the Coralville Fire Chief prior to the opening of the show. If a motor vehicle will be placed in the convention center it must be reviewed with the Event Manager in order to set up a time for the Fire Chief to come and provide a permit for each vehicle.

The cost of the permit is \$50.00 per car which will be billed to the individual or group Master Account (upon approval). The Fire Chief requires the following prior to granting a permit.

- 1) Gas tank must be at $\frac{1}{4}$ full
- 2) Gas tank cap must lock (must lock – tape will not be permitted)
- 3) Battery has to be unattached.
- 4). Upon entering, visqueen must be laid under the vehicle to prevent oil drip. Visqueen must remain under the vehicle during the time it stays on the convention floor.

NOTE: Once the car/truck is in place - the Fire Chief will come to inspect and will give you the permit.

If you e-mail your Event Manager the vin/model/make of car before arrival - the quicker you will get your permit. Otherwise the Fire Chief will take this information and will have to leave and bring the permit back to the property.

The covering will need to be double width at all corners so that cartwheels do not touch the floor surfaces. There must be covering underneath all equipment, whether permanent or staged. Visqueen and plywood may be used to temporary areas but the plywood must be flame retardant, and the visqueen cannot be used where there are electrical cords running around or underneath the surface. During Load In and Load Out, we recommend the least amount of traffic across the carpet as possible.

Forklifts and electrical cars are permitted only on the convention floor. Gas and propane forklifts will not be allowed in the hotel. It is against Marriott policy to utilize propane forklifts in the hotel. Therefore, should a forklift be used it is mandatory that it is an electric forklift. The Event Manager must approve any exceptions first and then by the Engineering Department. In the rare instances when forklifts are required for movement of freight inside the hotel, the company must wrap the wheels with plastic before entering the hotel and ballroom areas. **PLYWOOD IS NOT PERMITTED AS A RUNNER.**

Genie lifts will not be allowed in the ballroom. However, the hotel has a scissor lift, which can be made available for a rental fee (pending availability). Arrangements for usage can be made through your Event Manager. Hotel policy requires that a liability form be signed prior to usage.
