

***Welcome to 4<sup>th</sup> grade! We want to make sure that all of the wonderful skills you learned in third grade remain sharp over the summer!***

## **Math**

*We expect that our incoming fourth graders are*

- fluent in multiplication facts through 12s
- able to add and subtract four digit numbers with regrouping
- have a basic understanding of fractions

Required summer work: **20 minutes of Reflex every day. Students should start the year with 100% in Reflex.** For further practice you might consider going back 3<sup>rd</sup> grade skills in IXL in which you didn't get to a smartscore of 100 to practice.

## **Language Arts**

*We expect that our incoming fourth graders can*

- Read at grade level
- Write complete sentences with proper capitalization and punctuation
- Write an organized three paragraph essay independently
- Correctly and legibly write in both print and cursive

Keep reading over the summer. There are some fun reading challenges you can join! Check out Reading with the Rays, Spirit FM's Read to the Rhythm, Pizza Hut's BookIt! or programs at your local library.

Required summer work: **Be ready to take an AR test on a book in your reading level during the first two weeks of school.** Please **complete the three cursive practice worksheets attached.** If you need help with cursive, ask your adult to help you or ask them to look up the Pencil Pete videos on YouTube for you.

**We hope you have a wonderful summer break! See you in August!**
