

WE WANT TO HEAR FROM YOU!

Provider Perspectives on Autism Diagnostic Assessment with Eye-Tracking Technology

EMORY
UNIVERSITY
SCHOOL OF
MEDICINE

STUDY PURPOSE

To characterize and understand providers' perceptions around adopting and implementing eye-tracking technology called EarliPoint as part of autism diagnostic evaluation services.

WHO ARE WE LOOKING FOR?

Clinicians and providers who are positioned to conduct autism evaluations if given additional tools and training, including those based in specialty and primary care settings.

WHAT WILL IT INVOLVE?

- One 90-minute virtual session with:
 - An overview of EarliPoint technology
 - Completion of two brief surveys
 - An individual in-depth interview
- \$50 Giftcard Compensation
