

FREE VIRTUAL CHILDREN'S MENTAL HEALTH TRAINING FOR PRIMARY CARE PROVIDERS

Over a third of children with mental health conditions only receive care from their primary care providers (PCP), YET most PCPs believe they lack adequate mental health training.

Enroll in the Patient-Centered Mental Health in Pediatric Primary Care (PPP) Program to increase your skills and confidence in child mental health care.

“It was by far the best training course I have ever attended. After 3 days of an immersive experience, I felt confident in treating our patients with mental health disorders. I urge you all to invest in the training and the reward will be returned a thousandfold when you see your patients’ lives change for the better.”

**Dr. Anu Sheth, The Children's Care Network,
Board Chair & Pediatrician in Georgia**

Eligibility Pediatricians, Family Physicians,
Nurse Practitioners & Physician Assistants
practicing in the greater Atlanta area

Dates January 19–21 OR February 2–4, 2024

Format Virtual

Price FREE (actual value of \$2,200 per person)
thanks to the generosity of a local donor

Course Description

The PPP Program trains clinicians to diagnose and treat pediatric mental health conditions including ADHD, anxiety, depression and other common disorders seen in everyday practice. You'll leave the training with tools (e.g. screening assessments and quick medication guides) you can use immediately to:

- Correctly identify and differentiate among mental health conditions
- Effectively manage psychopharmacology
- Create and implement a treatment plan by mobilizing existing resources

This CME program has two components:

- A dynamic three-day, 17.75 hour interactive course
- Ongoing support from peers and primary care and child/adolescent psychiatry experts through case-based learning calls to solidify knowledge
