

Anthem Quality Measure Definitions

Appropriate Testing for Pharyngitis (CWP) This HEDIS measure looks at the percentage of episodes for members 3 years of age and older who were diagnosed with pharyngitis, dispensed an antibiotic, and received a group A streptococcus (strep) test for the episode. Code services correctly; use the following codes to identify pharyngitis and strep tests:

Description	ICD-10-CM	CPT
Pharyngitis (including tonsillitis)	J02.0, J02.8, J02.9, J03.00, J03.01, J03.80, J90, J03.91	
Group A streptococcal tests		87070, 87071, 87081, 874, 87650- 87652, 87880

Asthma Medication Ratio (AMR) This HEDIS measure looks at the percentage of members 5 to 64 years of age with persistent asthma who had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year. Use the following codes to appropriately document asthma:

Description	ICD-10-CM
Asthma	J45.21, J45.22, J45.30-J45.32, J45.-J45.42, J45.50- J45.52, J45.901, J45.902, J45.909, J45.991, J45.998

Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB) This HEDIS measure looks at the percentage of members 5 to 64 years of age with persistent asthma who had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year. Code services correctly, Use the following codes to identify acute bronchitis:

Description	ICD-10-CM
Asthma	J45.21, J45.22, J45.30-J45.32, J45.-J45.42, J45.50- J45.52, J45.901, J45.902, J45.909, J45.991, J45.998

Well Child Visits – 6 or more with a PCP before turning 15 months old – visits must be at least 2 weeks apart. This HEDIS measure looks at the members who had the recommended number of well visits. Code services correctly, proper coding is critical to ensure accurate reporting of these measures.

Description	CPT	ICD-10-CM	HCPCS
Well-care visits	99381-99385, 99391-99395, 99461	Z00.00, Z00.01, Z00.110, Z00.111, Z00.121, Z00.129, Z00.2, Z00.3, Z02.5, Z76.1, Z76.2	G0438, G0439, S0302

Well Child Visits – 3 to 6 years old with a PCP before turning 15 months old – visits must be at least 2 weeks apart. This HEDIS measure looks at the members aged 3-6 years who had at least one comprehensive well-care visit with a PCP during the current year. Code services correctly, proper coding is critical to ensure accurate reporting of these measures.

Description	CPT	ICD-10-CM	HCPCS
Well-care visits	99381-99385, 99391-99395, 99461	Z00.00, Z00.01, Z00.110, Z00.111, Z00.121, Z00.129, Z00.2, Z00.3, Z02.5, Z76.1, Z76.2	G0438, G0439, S0302

Childhood Immunization Status – MMR Children turning 2 years of age in the current year who received the following immunization on or before their 2nd birthday.

Childhood Immunization Status – VZV Children turning 2 years of age in the current year who received the following immunization on or before their 2nd birthday.

Immunization	Minimum required dose(s)	CPT
MMR	1	90707, 90710
VZV	1	90710, 90716

MMR, VZV, and Hep A vaccinations must be administered on or between the child's first and second birthdays.

Clinical Practice Guidelines

The above measures are national measures based on NCQA's HEDIS measures. Clinical Practice Guidelines for these measures can be found at [CMS.gov](https://www.cms.gov) or [NCQA](https://www.ncqa.org) websites.
