

Did you know...

- A total of eleven children under the age of 11 drowned in Palm Beach County in 2020 and 2021.
- Drowning is the leading cause of unintentional death for Florida children between the ages of 1 and 4.
- For every child who drowns, an estimated five nearly drown. Some of those children will need medical care for life.

Our mission

To prevent drowning, non-fatal drowning and other water-related incidents in Palm Beach County by educating residents about water safety and basic rescue techniques.

We are a government organization that has served our community since 1996.

Every drowning is preventable.

The majority of child drownings in Palm Beach County are due to lack of adult supervision and lack of barriers around a body of water. Most child drownings happen in backyard pools with an adult just feet away, inside a house.

Know the ABCDs of water safety

A Adult supervision. Always have a responsible adult, a “water watcher,” keeping an eye on the pool.

B Barriers. Have code-compliant fencing around the pool, and alarms and childproof locks on doors and windows.

Bathtub. Never leave a child alone.

Boating. Always wear a U.S. Coast Guard-approved life jacket.

Buckets. Keep them stored away.

C Classes. Sign your child up to learn to swim! CPR. Learn it!

Canal. Stay out of dirty water.

D Drain Safety. Stay away from pool drains.

Driving Safety. Learn how to escape a sinking vehicle.

What does the Drowning Prevention Coalition offer?

EDUCATION
