

# Childcare Corner

## Fluffy slime recipe: Duration 35 minutes

Fluffy slime is a great way to spend some time and connect with our children, not only is it fun but it also makes an amazing calm down toy!

### Supplies

Big mixing bowl

Measuring cups

Spoon

Paint or food coloring

Glitter, sand, or foam beads  
(some children like different textures)

¼ Cup of Water

2/3 Cup White Glue

2-3 Cups Shaving cream

1-2 Tablespoons of Contact  
solution

### Safety Tips:

**This project is not suitable for children under 4.**

Adults should make the slime and handle all chemicals. Do not substitute any ingredients in this slime recipes. If you have sensitive skin, wear gloves while playing with the slime. Always wash hands before and after use. If you notice any skin irritation discontinue use immediately. Slime is a science experiment and should be made and played with in moderation.

## Instructions:

Add your white glue to a bowl.

Add your water slowly to mix while stirring

Add your shaving cream and mix. The more shaving cream you add, the fluffier it will be. You may need to add more contact lens solution if you make it with 3 cups.

Add your food coloring or paint until you are satisfied with the color.

Slowly add contact solution you will begin to notice that the slime will start to stick to the spoon and pull away from the bowl, that is good you want it to be a sticky kind of consistency

Don't forget to add your glitter, sand, or foam beads!

You will need to start needing your slime with your hands make sure to put some lotion or baby oil on your hands to prevent the mix from sticking to your hands. Continue needing the mix until it stops being sticky be careful when adding your solution, adding too much will make your slime become hard and it will not be as stretchy.

## How long does slime last:

As long as you keep your slime in an air tight container it can last for about 4 months please note that the fluffiness does begin to go away after about a week but it will still be a good slime consistency if you would like to make it fluffy again just Add 2 cups of shaving cream and 2 Tablespoons of contact solution (If slime feels creamy add some more glue).
