

**Instructed by Ellaline Davies of Safety Works Consulting Inc.**

**After taking the Course, participants tell us...**

"I really enjoyed the 2-day Gold Seal Supervisor course instructed by Ellaline, through the Niagara Construction Association. She made the course very interactive and delivered the content of the course in a clear and entertaining way. She constantly made sure we were all participating by asking us questions and individually selecting us by name, to ensure we were involved in the discussion. This included reading materials from the Greenbook, participating in question-and-answer sessions, and completing modules and tests in the Supervisor handbook that was provided to us. She is very knowledgeable in her field as she went through many situations from her past experiences to bring her teaching to life. I would definitely recommend this course to anyone in a leadership role. The course was delivered via zoom, and the class size of 6 made it very easy to interact with one another, and we had no issues with interruptions. She was very conscious of break times and allowed us to step away for work-related calls if needed.

After successfully completing this course, I feel that I am more confident in the role I play in the Health and Safety of my company as both a Leader and as the JHSC Management Representative. Overall, this was a very educational and fun experience."
