

ONLINE COURSE

National Construction Safety Awareness

Allows self-paced, online e-learning, accessible 24/7 on desktop, tablet, and mobile devices.

For everyone who works in construction.

Understand what you can do to keep yourself, your co-workers, and the environment you work in safe every day.

- ✔ Know your rights and responsibilities on any work site, and those of your co-workers and your employer.
- ✔ Learn the necessary communications to ensure the work gets done properly and safely.
- ✔ Recognize the measures you need to take off the job site to make sure you're ready for work on the job site.
- ✔ Identify the personal protective equipment you'll use on the job site and how to use it effectively.
- ✔ Know the precautions to take when working with workplace chemicals, including understanding the Workplace Hazardous Materials Information System (WHMIS) and safety data sheets.
- ✔ Understand the importance of protecting the environment around your work site, and how to make that happen.
- ✔ Recognize the different types of hazards you may encounter on a job site, and how to assess and control them.
- ✔ Identify the tools, equipment, and vehicles you'll use on site, and how to use them safely.
- ✔ Know precautions to take when working at heights, excavating and trenching, and working near power lines.
