

I Have This Business Degree, Now What?

Have you dreamed of a career in the busy and rewarding construction industry in Canada? Maybe working in a top-level management position with a \$3B General Contractor, or a major \$500M Subcontractor. Or, maybe you desire to start your own company?

Salaries in the construction industry in Canada largely outrank the national average management compensation by 20 to 30%.

Get and understand construction industry terminology, project processes, know the actors and understand how construction teams work in 6 hours or less! You cannot get your foot in the door if you do not understand how city hall works for permitting, how bidding and tendering in Canada works, estimating processes and KPI's used in the industry, not to mention, - which contracting method makes the most sense for a specific outcome.

This on-line LIVE 6-hour course is invaluable for new entrants into the industry seeking that upper-level management role of a lifetime and the opportunity to climb the ladder quickly. Enjoy working with our VIRTUAL CHALK platform and experience the best in On-Line LIVE delivery of professional development. Built by Industry professionals, for industry professionals.
