# Construction 101

As builders, we understand the importance of a **strong** foundation. Your employees are the foundation of your business. Strengthen yours today with **Construction 101**, a 16 hour workshop on the basic tenets of the construction industry.

## Perfect For :

- Administrative staff
- New professionals
- New Employees
- Contractor companies

## CONSTRUCTION 101 BACK BY POPULAR DEMAND!

"**Construction 101** was a concise, well-run workshop that gave a great overview of contracts and legal matters as it pertains to the Construction Industry.

The instructor was very knowledgeable and his course delivery was to the point, concise and not filled with legal-ease.....very easy to follow.

I would recommend it to anyone involved in the administration of construction contracts".

**Lisa Heywood, Facility Services, District School Board of Niagara**

Sign up for **Construction 101: The Basics....and much more!**

It's no surprise that senior industry leaders are beginning to plan their exit from construction. With this loss, not only is it important that our young leaders be ready to take the helm, but that they absorb the vast amounts of knowledge exiting with these professionals.

**Construction 101** is a course that brings together individuals from across the construction industry, where the stories of senior leaders will inspire others in shaping the outcomes from this nationally recognized course.

**Construction 101** may be better defined as a way to build and share valuable knowledge, rather than an introduction to the construction industry as a whole.

With attendees spanning a mosaic of demographics and industry experience, students can expect to gain a better understanding of the whole construction process, from beginning to end giving attendees the glance at all the areas of the construction field, not just one's own.

Consisting of topics including construction documents, legal matters, and project management, this two-day Gold Seal Certified course is an important tool in your work belt with a plethora of valuable information.

Industry leading professionals are invited to speak, offering real world insight into topics such as bonds, insurance, legal claims and the daily lives of estimators and project managers.

The term 101 proves to be deceptively aimed towards new comers in the industry, but this is an amazing course for those new and veterans of the industry.

The understanding of how and what we all do is beneficial to timeliness and completion of projects efficiently and effectively. Sign up TODAY!

**[www.constructionlab.ca](http://www.constructionlab.ca)**

Construction is Canada's second largest goods producing activity that accounts for thirteen percent of Canadian GDP. This course will outline the basics of construction including procedures, laws and processes which focus on:

- Introduction to the Construction Industry
- Tendering, Bidding and Award of Contracts
- Format of Contracts
- Laws, Standards and Procedures in Construction
- Risk Management in Construction
- Construction Project Management & Administration

This course aims to breakdown the complexity of the Construction Industry by showing how various stakeholders - owners, consultants, contractors, sub-contractors, manufacturers, suppliers and service providers fit into the Industry. Participants will engage in learning activities that will enable them to appreciate project delivery from concept to closeout.

**This course is ideal for administrative staff or anyone who is new to the Construction Industry.**

**LEARNING Outcomes:**

Upon successful completion of this course participants will be able to:

1. Summarize the role of various parties within the construction industry.
2. Compare types of contractors and key players involved in the Industrial, Commercial, Institutional, Civil (ICIC) sector construction process.
3. Identify applicable laws, standards, and procedures in construction projects.
4. Describe contractual methods for project delivery.
5. Name elements of risk management in the construction industry.
6. Discuss construction management administration.
7. Explain the role of various professional and trade industry associations

***Pre-payment is needed for this registration. We require 48 business hour advance notice for cancellation.***
