Occupational Health and Safety Branch - Construction Health and Safety Program

Section 1 – Senior Manager's Comment

Welcome to summer. To me it's a time when the things we've started to do grow roots and begin to flourish. Unfortunately, the May statistics reported below seem to say that we haven't planted enough seeds to make basic elements of safety grow. Of the 3,418 total enforcement actions in May 2026, 648 orders were for fall protection and 573 were for protective headwear or footwear. That is 36% of all orders under the regulation were for basic health and safety requirements. If the 250 orders for NOPs and Form 1000's are included that jumps to 47%.

Last year's Coroner's Deaths Review was focused on deaths related to falls. There has been significant investment in WAH training, and inspectors look for fall protection contraventions as one of their first priorities on a project. Where is the breakdown? Are workers ignoring rules? Are supervisors failing to enforce rules? There are some good actors out there with a strong safety focus. But the stats show us that many, many more are not making the effort to meet minimum standards.

Let's take time this summer to root the weeds out of our gardens!

Sincerely, Chris Boccinfuso

A/Senior Manager
Construction Health and Safety Program
Occupational Health and Safety Branch
Ontario Ministry of Labour, Training and Skills Development

Section 2 – What's New

Ministry hires 109 new occupational health and safety inspectors and employment standards officers

Last month, the Ministry of Labour, Immigration, Training and Skills Development welcomed 29 new employment standards officers and 80 occupational health and safety inspectors. The new recruits are engaged in rigorous training to ensure consistent enforcement of fair, safe and healthy workplaces across the province. Training includes in-class learning about provincial law and its application to workplaces, as well as hands-on practice alongside experienced mentors in the field. The ministry's newest recruits will start addressing employment standards claims in fall 2026 and visiting workplaces in their full capacity in early 2027.

Section 3 – Court Bulletin(s)

Workplace Injury at Mount Forest Construction Project Results in $145,000 Fine for Roofing Company and Director

Convicted: Reilly's Roofing Ltd., a roofing contractor based in Georgian Bluffs, Ontario and Adam Reilly, director and officer of the company.

Location of Workplace: 362 Fergus Street North, Mount Forest, Ontario

Description of Offence: A worker was critically injured after falling from a ladder at a residential construction project. The company and its director failed to ensure that required fall protection measures were in place for work performed at height. This was contrary to section 25(1)(c) and section 32(a) of the *Occupational Health and Safety Act*, and section 26.1(2) of Ontario Regulation 213/91 (Construction Projects).

Date of Offence: December 22, 2023

Date of Conviction: June 3, 2026

Penalty Imposed:

- Following guilty pleas in the Provincial Offences Court in Guelph, Reilly's Roofing Ltd. was fined $130,000 and Adam Reilly was fined $15,000 by Justice of the Peace Royak; Crown Counsel was Katie Krafchick.
- The court also imposed a 25 per cent victim fine surcharge as required by the *Provincial Offences Act*. The surcharge is credited to a special provincial government fund to assist victims of crime.

Background:

- On the day of the incident, workers employed by Reilly's Roofing Ltd. attended a residential construction project to install shingles on a single-storey home.

- To get to the roof, a worker climbed a ladder placed on frozen, uneven ground that was not secured at the top or bottom.
- The worker was not wearing fall protection, and no fall protection system was installed at the time of the incident.
- While the worker was stepping from the ladder onto the roof, the ladder twisted. The worker fell approximately 11 feet to the ground and was critically injured.
- A Ministry of Labour, Immigration, Training and Skills Development investigation found that required fall protection measures were not in place.
- The company, as an employer, and Adam Reilly, as its director, failed to ensure that prescribed measures for fall protection were carried out, contrary to the *Occupational Health and Safety Act* and Ontario Regulation 213/91.

Workplace Injury Results in $100,000 Fine for Roofing Company

Convicted: Moffat Bros. Roofing Ltd., 2213 Lovshin Road, RR 4, Cobourg, Ontario

Location of Workplace: 5325 County Road 10, Port Hope, Ontario

Description of Offence: A worker was critically injured after falling from the roof of a building at a construction project. The company failed to ensure that a worker was protected from falling when performing work at height. This was contrary to section 25(1)(c) of the *Occupational Health and Safety Act* and section 26.1(2) of Ontario Regulation 213/91 (Construction Projects).

Date of Offence: August 1, 2023

Date of Conviction: June 3, 2026

Penalty Imposed:

- Following a guilty plea in the Provincial Offences Court in Cobourg, Moffat Bros. Roofing Ltd. was fined $100,000 by Justice of the Peace Joel Kulmatycki; Crown Counsel was Shantanu Roy**.**
- The court also imposed a 25 per cent victim fine surcharge as required by the *Provincial Offences Act*. The surcharge is credited to a special provincial government fund to assist victims of crime.

Background:

- A worker employed by Moffat Bros. Roofing Ltd. attended a construction project to complete a steel roof replacement.
- The worker was clipped to the tether rope of a safety line, but it was not long enough to reach the position required to install the final roof panel. As a result, the worker unclipped the safety line.
- The worker then attempted to step over a steel panel being fastened to the roof, lost their balance, and fell approximately 22 feet to the ground, sustaining critical injuries.
- The worker was not using any method of fall protection at the time of the incident, despite fall protection equipment being available onsite.
- The company failed to ensure that the measures and procedures prescribed by section 26.1(2) of Ontario Regulation 213/91 were carried out in the workplace contrary to section 25(1)(c) of the *Occupational Health and Safety Act*.
