Occupational Health and Safety Branch - Construction Health and Safety Program

Section 1 – Senior Manager's Comment

It's looking to be a busy year for legislative change as our Minister is spearheading health and safety harmonization across the provinces and territories. Already we've seen changes with respect to mobile elevating work platforms and hard hats. Work is underway on standards for construction entry level training and supervisor training. This is important work and may require changes to happen. It is an exciting time to be working in this field.

Construction Health and Safety Awareness week begins next week, and I was reflecting on what to say. I looked at the enforcement stats below and realized that in March alone, inspectors found over 450 contraventions that required stop work orders at the 1200+ projects they visited. It speaks to a lack of awareness on the part of supervisors being accountable and the importance of health and safety reps, JHSCs and WTC members speaking up for their members. Stop work orders address hazards that are immediately dangerous to workers, so it isn't that 450+ orders got written, it's that there were potentially 450 circumstances where workers were endangered. Please take next week and refocus on being aware that accepting a fault equals accepting that workers can be injured on a project. It should always be unacceptable.

Sincerely,

Chris Boccinfuso

A/Senior Manager

Section 2 – What's New

May: Steps for Life

Each spring across Ontario, Steps for Life events raise awareness about the community impacts of workplace tragedies. These five-kilometre charity walks support Threads of Life, a Canadian charity committed to supporting people affected by workplace injury, illness or death, and preventing future tragedies from occurring.

Section 3 – Court Bulletin(s)

Construction Company Fined $60,000 After Workplace Fatality

Convicted: Hendrik Jan Van Ginkel Construction, 324943 Norwich Road, Norwich, Ontario.

Location of Workplace: A dairy farm located at 155532 15th Line, Thamesford, Ontario.

Description of Offence: A worker was fatally injured after falling from the roof of a barn under construction. The company failed to ensure the worker was using fall protection when exposed to the hazard of falling more than three metres, contrary to section 26.1(2) of Ontario Regulation 213/91 as required by section 25(1)(c) of the *Occupational Health and Safety Act*.

Date of Offence: December 7, 2023

Date of Conviction: March 5, 2026

Penalty Imposed:

- Following a guilty plea in the Ontario Provincial Offences Court in in Woodstock, the company was fined $60,000 by Justice of the Peace Anne-Marie Tymec; Crown Counsel was Graeme Adams.
- The court also imposed a 25 per cent victim fine surcharge as required by the *Provincial Offences Act*. The surcharge is credited to a special provincial government fund to assist victims of crime.

Background:

- On December 7, 2023, the company was constructing a barn on a farm in Thamesford.

- A worker contracted by the company was installing strapping across roof trusses on the barn. They were positioned approximately 30 feet above ground level, above the truss framing.
- While performing this work, the worker fell through the truss framing to the ground below and sustained fatal injuries.
- The worker was not using any method of fall protection at the time of the incident, despite fall protection equipment being available onsite.
- The company did not assign a supervisor or provide formal safety talks on this project, and although it had a written policy, no formal fall protection procedures were implemented at the time of the incident.
- Following the incident, the Ministry of Labour, Immigration, Training and Skills Development issued orders, including stop work orders, requiring the company to implement fall protection measures and develop a rescue plan, which were complied with.
