

December Sack of SACC

Homework Reimagined: Applying Academics in Afterschool/ Sack of Activities that Support Academic Mastery

December 14th 10:00-12:00

Programs indicate that many parents expect them to provide homework help . However, a program's ability to do this depends on many factors.

In this session, we will look specific factors– Students, Staff, Schedules and Spaces that help determine to what ^{*} extent you can realistically provide academic support. We will also use the SACC activities to explore and reflect on your program's mission and goals, and generate ways you can provide academic support or enrichment that align with your program's resources and desired outcomes.

Participants will receive a “sack” of Activities that reinforce and provide enrichment for concepts learned in school.

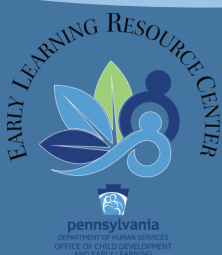

Coming in 2022:

STEM in Afterschool Series Community of Practice
