INNOVATIONS IN PORT STRUCTURES

JD Fields is proud to bring Halifax area port engineering and contracting professionals this free ½ day seminar on the latest technology in steel marine geostructures.

THE WESTIN NOVA SCOTIAN

1181 Hollis St, Halifax, NS
B3H 2P6, Canada

June 25th, 2025

8:00 am - 9:00 am
Breakfast/Registration

9:00 am - 9:05 am
Welcome & Intro

9:05 am - 9:30 am
Bridge Pier Protection Structures

9:30 am - 10:00 am
High Modulus Design

10:00 am - 10:30 am
AM Retain Software

10:30 am - 10:45 am
Break

10:45 am - 11:30 am
Pipe Pile Manufacturing for Port Marine Applications

11:30 am - 12:15 pm
Sustainability/Smart Sheet Pile for Ports

12:15 pm

Lunch provided by JDF

Itinerary subject to change

JD FIELDS & COMPANY, INC.
A FIELDS COMPANY

JDF & our piling partners are very excited to present the latest developments in steel geostructures. From designing with sustainable, higher yield sheet piles, pipe piles, and high modulus combined walls for marine foundations, to discovering the new Smart Sheet Pile System for monitoring performance and maintenance of critical infrastructure, the technical program will reveal the features and benefits of the new “green” steel technology.

All who attend will receive a certificate for 3.0 PDH and the opportunity to win free design software!

Questions? Call (803) 521-5431 or email: tmccarry@jdfields.com.
