For Immediate Release

Preventative Maintenance Initiated on Thirteen Bridges Along Interstate 10 between Loma Linda and Yucaipa

SAN BERNARDINO – Caltrans continues to work on a $4.6 million preventative maintenance on thirteen bridges project at Interstate 10 (I-10). This work is funded through Senate Bill (SB) 1, the Road Repair and Accountability Act of 2017.

Preventative maintenance will improve bridge road conditions and safety by strengthening the bridge travelway with new polyester concrete overlay, repairing unsound concretes, replacing joint seals, upgrading approach concrete slabs, furnishing with new HMA, replacing road signs, and installing new pavement markings along with new traffic stripes. These elements aim to enhance safe accessibility and produce a smoother surface for all roadway users.

Constructions signs have been placed in the project zone to make the traveling public aware of the crews in the area. Operations will be on Interstate 10 between Loma Linda

BE WORK ZONE ALERT

MOVE OVER

and Yucaipa. It is expected to be completed by Spring 2027. All work schedule and timelines are dependent on weather conditions and the availability of materials.

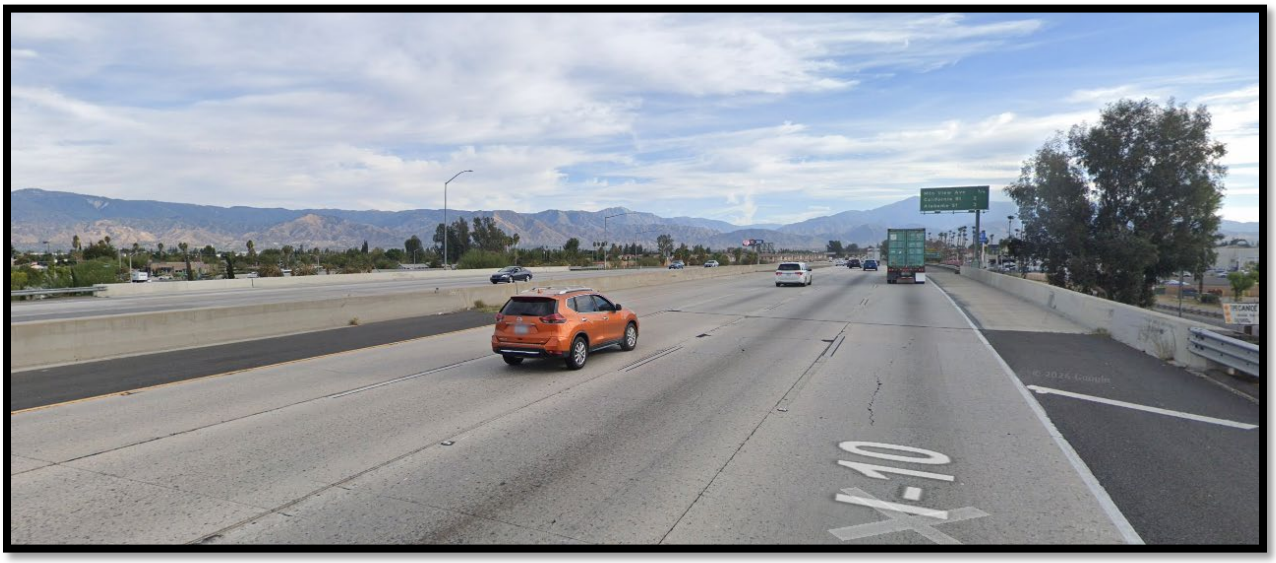

Figure 1 I-10 Bridge at Tippecanoe Ave

<u>Week of November 2nd Work Activities</u>:

Construction crews will continue the work activities at both eastbound and westbound I-10 between Loma Linda and Yucaipa Monday through Friday from 8:00 p.m. to 6:00 a.m. Multiple alternating lane closures, reverse control lane closures with flagging, freeway connector closures, ramp closures, and shoulder closures may occur as needed. The work activities will include joint seal installations and HMA replacement on bridges along I-10 between Tippecanoe Ave and Live Oak Canyon Rd throughout the week. Closures are dependent on contractors receiving proper materials for each job function. They can be changed or canceled at any time. Weather permitting.

Work locations are as follows:

<u>Eastbound (EB) I-10 on-ramp and off-ramp closures</u>

- Live Oak Canyon Rd. off-ramp

<u>Westbound (WB) I-10 on-ramp and off-ramp closures</u>

- Live Oak Canyon Rd. on-ramp

<u>I-10 overcrossing bridge/surface street with reverse control lane closure with flagging operations</u>

- Richardson Ave

Westbound (WB) and Eastbound (EB) I-10 with alternating lane closures

- EB I-10 mainline bridge near Live Oak Canyon Rd.
- WB I-10 mainline bridge near Live Oak Canyon Rd.

What to Expect:

Expect traffic delays due to alternating lane closures, reverse control lane closures with flagging, freeway connector closures, ramp closures, and shoulder closures may occur as needed on both eastbound and westbound I-10 during construction. Approximate flagging wait times per side may take up to 20 minutes. Traffic cones and control devices will be in place to separate work areas from traffic. Signage will be placed on the state route to alert drivers of upcoming work zones. Commuter, public transportation, and pedestrian access remain as work requires temporary lane closures and shoulder closures at various points along the route. Plan-ahead and please be mindful of work area signage as law enforcement will enforce applicable laws and regulations. Please proceed cautiously as work vehicles and crews may move in and out of shoulder areas.
