

Noah's Ark

Paper Plate Craft

Materials you will need are a printer, paper , scissors, glue, brown paint or markers and a dinner sized paper plate.

If you don't have a paper plate, just trace a dinner plate onto a piece of cardboard (from a cereal box or the like).

- Fold the paper plate in half. Paint or color the bottom brown.
- Print out the template.
- Color pieces, as necessary.
- Cut out the ark top.
- Fold the ark top in half and glue. Cut it along the dotted line.
- Once the paper plate is dry, cut halfway along the fold line
- Slide the ark top cut into the paper plate cut as far as it will go (the ark top will end up positioned in the center).
- You can tape or staple it a bit to make sure it won't fall apart.
- The ark will stand up on its own and will "rock" (the paper plate is curved).
- OPTIONAL: clip out animal images from a magazine and glue to the ark.
