

**Two or more certified long term care (LTC) facilities (SNFs and/or NFs) transfer patients between facilities to create a COVID-19 and non-COVID-19 facility. Allowed under Blanket Transfer Waiver without additional approval. Each certified facility bills Medicare for the residents in their facility.**

CMS is waiving requirements in 42 CFR 483.10(c)(5); 483.15(c)(3), (c)(4)(ii), (c)(5)(i) and (iv), (c)(9), and (d); and § 483.21(a)(1)(i), (a)(2)(i), and (b) (2)(i) (with some exceptions) to allow a long term care (LTC) facility to transfer or discharge residents to another LTC facility solely for the following cohorting purposes:

- Transferring residents with symptoms of a respiratory infection or confirmed diagnosis of COVID-19 to another facility that agrees to accept each specific resident, and is dedicated to the care of such residents;
- Transferring residents without symptoms of a respiratory infection or confirmed to not have COVID-19 to another facility that agrees to accept each specific resident, and is dedicated to the care of such residents to prevent them from acquiring COVID-19; or
- Transferring residents without symptoms of a respiratory infection to another facility that agrees to accept each specific resident to observe for any signs or symptoms of a respiratory infection over 14 days.

**Transfer residents from one or more certified LTC facilities to a non-certified location that is state approved and where residents must be cared for by LTC facility staff. Medicare reimbursement remains with the LTC facility caring for patients in the new location. This location could be utilized by multiple LTC facilities, providing care with their own staff.**

CMS is waiving requirements related at 42 CFR 483.90, specifically the following: Provided that the state has approved the location as one that sufficiently addresses safety and comfort for patients and staff, CMS is waiving requirements under § 483.90 to allow for a non-certified LTC building to be temporarily certified and available for use by a LTC facility in the event there are needs for isolation for COVID-19 positive residents, which may not be feasible in the existing LTC facility structure to ensure care and services during treatment for COVID-19 are available while protecting other vulnerable adults.

These requirements are also waived when transferring residents to another facility, such as a COVID-19 isolation and treatment location, with the provision of services “under arrangements,” as long as it is not inconsistent with a state’s emergency preparedness or pandemic plan, or as directed by the local or state health department. In these cases, the transferring LTC facility need not issue a formal discharge, as it is still considered the provider and should bill Medicare normally for each day of care. The transferring LTC facility is then responsible for reimbursing the other provider that accepted its resident(s) during the emergency period.

**Transfer of COVID-19 residents to Federal/State run facility staffed with Federal or State personnel:  
Transfers by Order of Governmental Authority (e.g., FEMA) and no reimbursement to the LTC facility.**

**No waiver necessary as long as transfer is not inconsistent with a state's  
emergency preparedness or pandemic plan, or as directed by the local or  
state health department**
